2018 National FFA Forestry Career Development Event Knowledge Exam

Directions: Select the best answer and bubble it in on the score sheet provided. You may write on test booklet, if needed.

1.	An example of a job performed by a forester with a Bachelor of Science (undergraduate) degree is							
	(KI, p.38) CS.05.01.02.a							
	a. Research Scientist		Forestry Technician					
	b. Urban Forester	d.	Fire Fighter					
2.	The smallest portion of timberlands in the United States below	The smallest portion of timberlands in the United States belongs to (KI, p.31) NRS.02.04.02						
	a. Private Landowners	c.	Forest Industry					
	b. Public Lands	d.	Wilderness Areas					
3.	Several layers of vegetation found in a forest is called the	·	(FS, p.6) NRS.01.05.01.b					
	a. Strata		Herb layer					
	b. Canopy	d.	Shrubs					
4.	An example of a nonrenewable resource is (FS, p.11	An example of a nonrenewable resource is (FS, p.11) PST.01.01.01.a						
	a. Forest	c.	Coal					
	b. Wildlife	d.	Crops					
5.	are considered to be better sources for fuelwood. (FS,p.15) PST.01.01.01.a							
	a. Softwoods	c.	Low-density woods					
	b. Hardwoods	d.	Medium density woods					
6.	is the movement and removal of soil caused by human and animal activities, or							
	catastrophic natural events. (KI, p. 5) CS.04.01.01.b							
	a. Erosion	c.	Accelerated Erosion					
	b. Natural Erosion	d.	Soil Degradation					
7.	is an obligate parasite, and while trees usually do not die from the infestation, their growth is restricted. (KI, p.129) NRS 04.02.01.a							
			Namatada					
	a. Slime Flux		Nematode Heart Pot					
	b. Rust	a.	Heart Rot					
8.	Which is not a degree of relative crown density? (FF, p. 123) NRS.01.05.01.b							
	a. Thin		Open					
	b. Closed	d.	Partial					
9.	What is the rotating ring on a compass, graduated from zero to 360 degrees, and labeled with cardinal							
	directions and quadrants called? (KI, p. 7) NRS.03.02.01.a							
	a. Dial		Hozzle					
	b. Bezel	d.	Ring					

10. Which tree species produce achene fruit? (KI, p.75) NRS.0	1.02.01.b
a. Ash	c. Black Cherry
b. Sycamore	d. Black Walnut
11. The is sometimes known as the boreal forest. (FS,p.	28) NRS.01.05.03.c
a. Northern Hardwoods Forest	
b. Pacific Coast Forest	
c. Bottomland Hardwood Forest	
d. Northern Coniferous Forest	
12. A is formed through meiosis consists of one chroma p.119) PS.02.02.01.b	tid from each original chromosome pair. (FS,
a. Haploid cell	c. Tetrad cell
b. Diploid cell	d. Mother cell
13. A forest that has been regenerated from the roots, stumps, c (FS,p.122) NRS.01.01.01c	or branches of other trees is known as a
a. High forest	c. Bottom forest
b. Low forest	d. Canopy forest
14. Which of the following DOES NOT influence the color of	soil? (FS,p.136) CS.04.01.01.b
a. Amount of organic matter	c. Minerals in the soil
b. Drainage of the soil	d. Amount of silt
15. Illuviation, the buildup of translocated soil components, is CS.04.01.01.b	located in the (FS,p.139)
a. A soil horizon	c. C soil horizon
b. B soil horizon	d. E soil horizon
16. Pulpwood being processed for paper is debarked then chipp (KI, p. 34) CS.02.02.02c	ped into pieces about in size.
a. 1	c. 3
b. 2	d. 4
17. The price of timber sold may be established in all except?	(FF, p. 200) NRS.02.04.02.b
a. Diameter	c. Load Scale
b. Tree Scale	d. Lump Sum
18. To use the, a forester pushes or drives the cu	tting edge through the bark until it reaches
wood, then pushes the guard against the tree or log for a me	easurement. (KI, p.93) ESS.01.02.02.a
a. Bark Gauge	c. Tree Caliper
b. Increment Borer	d. Soil Auger

19. Which of the following is not considered a nat	ural firebreak? (FF, p. 320) NRS.04.04.01.b
a. Streams	c. Wind breaks
b. Logging Roads	d. Highways
20. A complete soil profile includes these horizons	s in what order? (FS,p.139) CS.04.01.01.b
a. A,B,C,E,O,R	c. O,A,E,B,C,R
b. B,A,C,O,E,R	d. R,O,A,C,E,B
21 are responsible for heart rot. (FS,p.159)	
a. Bacteria	c. Viruses
b. Fungi	d. Microplasmas
<u> </u>	itions such as drought, heat, cold and other conditions,
	rge number of trees in an area. (FS,p.166) NRS.04.02.01.a
a. Abiotic diseases	c. Fungus
b. Biotic diseases	d. Parasites
23 is a method of controlling harmful insection control.(FS,p.181) NRS.04.03.01.a	ets and is proving to be a more practical approach to insect
a. Mechanical control	c. Genetic engineering
b. Chemical control	d. Integrated pest management
24. What causes the largest impact to species that l	have been listed on the threatened and endangered
list?(FS,p.202) NRS.03.01.07.a	
a. Regulated hunting	c. Landscape alteration
b. Illegal killing	d. Competition from introduced species
25 maps are color-enhanced photo	tographic images that show land features. (KI, p.141)
NRS.03.02.01.a	
a. Orthophoto	c. Relief
b. Physical	d. Road
26. Which species of wood does not have the most	t notable effects of spalting? (KI, p. 48) NRS.02.04.01.a
a. Red Maple	c. American Beech
b. Black Birch	d. Yellow Poplar
27. Which species has the highest heating value pe	er standard green cord? (FF, p. 371) PST.01.01.01a
a. Hickory	c. Red Maple
b. White Oak	d. Eastern Cottonwood
28. The major commercial use for mushrooms is _	(KI, p. 51) NRS.02.04.01.a
a. Toxin control	c. Medical Research
b. Dyes for textiles	d. Food

29. Magne	etic North is continually shifting, so a compas	ss must be adju	sted using/
declin	ation. (KI, p. 146) NRS.03.02.01.a		
a.	North / South	c.	South / West
b.	East / West	d.	North / West
30. The _	is made up of trees, shrubs, an	d vines growin	g beneath the canopy. (KI, p. 60)
NRS.0	01.05.03.c		
a.	Emergent Layer	c.	Understory Layer
b.	Canopy Layer	d.	Forest Floor
31. Some	kinds of plants maintain their dominance ove	r other plants b	y releasing chemicals into the area
close a	around them that provide small doses of poiso	on to invading p	plants. This is called
(FS,p.	221) NRS.01.05.03.c		
a.	Allelopathic effect	c.	Carbonization process
	Adaptive behavior	d.	Dendrification
32. The fir	rst priority in any fire suppression effort is	(FS,p.294) NRS.04.04.01.b
	Fire crew safety		
	Evaluating the value of recourses threatened	1	
	Evaluating the availability of firefighting re-		
	Deciding whether to suppress the fire or lett		
33. Which	of the following terms best describes the mo	de of action of	a firefighter who is setting backfires
	a wildfire? (FS,p.297) NRS.04.04.01.b		
_	Direct attack	c.	Indirect attack
b.	Incendiarism	d.	Prescribed burn
34. Resin	ducts are openings in the wood through which	h resin moves v	within a live tree. They are present in
	.(FS,p.331) PS.02.02.03.a		
a.	Softwoods	c.	Heartwood
b.	Hardwoods	d.	Sapwood
35. The de	ensity of wood depends on the ratio of to	o the volume o	f wood. (FS,p.331) PS.02.02.03.a
a.	Weight of wood	c.	Texture of wood
b.	Cell wall material	d.	Plant vascular tissue
36	is site preparation that effective	y clears a site o	of unwanted vegetation and woody
	with minimal soil disturbance. (KI, p.107) N		
	Chemical		Prescribed Burning
b.	Mechanical		Clearcutting
37	is a lengthwise separation of the w	ood which use	ially extends across the rings of annua
	n, commonly resulting from stresses set up in		·
a.	~	=	Check
	Catface		Conk
~•	and the second s		

38. Trees directly influence the yield of a watershed by extra	cting water from the soil by	(KI, p.
63) PS.01.01.03.b		
a. Osmosis	c. Capillary Action	
b. Diffusion	d. Transpiration	
39 thinning is useful in plantations becau	se of their planting layout of rows and	space
within the row. (KI, p.109) NRS.03.01.01.c		
a. Geometric	c. Pre-commercial	
b. Commercial	d. Crown	
40. If a sample plot is ¼ acre in size, what is the plot radius?	(KI, p. 147) ESS.05.01.01.c	
a. 37.25 feet	c. 58.9 feet	
b. 52.7 feet	d. 66 feet	
41. Windbreaks should be long in relation to their height; a _ NRS.04.01.02.c	ratio is recommended. (KI, p	o. 63)
a. 2:1	c. 10:1	
b. 5:1	d. 12:1	
42. The migrated to the United States from Fr	rance, and now infests white and red oa	ık trees
in the Northeast. (KI, p.121) NRS.04.03.01.a		
a. Tent Caterpillar	c. Douglas Fir Tussock Moth	
b. Gypsy Moth	d. Spruce Budworm	
43. Which of the following snakes is not a pit viper? (KI, p. 1	63) NRS.01.02.03.b	
a. Rattlesnake	c. Copperhead	
b. Cottonmouth	d. Coral Snakes	
44. Which of the following is not a characteristic of an angio	sperm? (KI, p. 70) NRS.01.02.01.b	
a. Broadleaves	c. Dendritic	
b. Dry or Fleshy Fruit	d. Resin Ducts	
45. According to OSHA, ear muffs or plugs are required for higher. (KI, p. 166) CS.03.04.01.a	workers exposed to decibels pe	r hour oi
a. 75	c. 95	
b. 85	d. 105	
46. Which species and bark type is incorrect? (KI, p. 74) NR	S.01.02.01.b	
a. American Beech – Smooth	c. Hickory – Blocky	
b. Eastern White Pine – Scaly	d. Black Oak – Furrowed	
47. How many seedlings are needed to plant 10 acres at 6' x	8'? (FF, p.175) NRS.04.01.02.c	
a. 480	c. 10000	
b 0075	d 210	

48 is a chemical that kills fungi or prevents them from causing diseases, usually on plants of economic importance. (FF, p. 465) NRS.04.02.01.a					
a. Pesticide	c. Insecticide				
b. Fungicide	d. Rodenticide				
49. Axial parenchyma cells originate from the	_ forming a network of living cells around the tree.				
They transport sugars (food) to the parenchyma cel	ls within the growth ring, and they store starch.				
PS.02.02.01.c					
a. Heartwood	c. Sapwood				
b. Cambium	d. Seriate				
50 are unthickened portions of cell walls through which sap passes from ray cells to fibers, or vice versa. (FF, p. 229) PS.02.02.01.c					
a. Bordered Pits	c. Vertical Resin Duct				
b. Medullary Rays	d. Simple Pits

2021 National FFA Forestry General Knowledge Exam

1.	Which soil type holds the least amount of		
	a. clay b. sand		loam sandy loam
2.	A half-section of land contains acres. a. 40 b. 80		160 320
3.	The DBH range of trees in sapling stands a. 0" - 5" b. 5" - 10"	C.	10" – 15" none of the above
4.	A block of wood 4 inches thick by 6 inche contains board feet of wood volume. a. one b. two	C.	vide and 12 inches long three four
5.	Trees that have the largest crowns and ar stand are called trees. a. intermediate b. co-dominant	C.	aller than other trees in the suppressed dominant
6.	Which one of the following species has open a. oak b. maple	C.	osite leaf arrangement? hickory sycamore
7.	The tree tissue responsible for transporting the roots is called: a. xylem b. cambium	C.	food made in the leaves to phloem bark
8.	What two measurements are needed to ostand? a. age and DBH b. height and DBH c. DBH and soil index		ermine the site index of a age and height

9.	The proper distance one should hold a Bi	ltm	nore stick from their eye is		
	inches.				
	a. 15		25		
	b. 20	a.	30		
10.	Name the regeneration system where he scattered throughout the harvested area forest stand.		• •		
	a. clearcut	C.	seed tree		
	b. shelterwood	d.	single-tree		
11.	How many seedlings will be planted on o a. 302		acre at a spacing of 10'x10'? 889		
	b. 436		1,742		
		.	,,, ,,_		
12.	A hypsometer measures:				
	a. soil moisture		tree diameter		
	b. tree volume	a.	tree height		
13.	The study of forest diseases is called:				
	a. dendrology	c.	forest entomology		
	b. forest pathology	d.	forest hydrology		
14.	Log grade is NOT determined by which fa	acto	or?		
	a. length		defects		
	b. diameter	d.	age		
15	What are the dimensions for a standard of	2011	d of wood?		
15.	a. 2 feet high x 4 feet wide x 8 feet long	Orc	a or wood?		
	b. 4 feet high x 4 feet wide x 8 feet long				
	c. 4 feet high x 2 feet wide x 8 feet long				
	d. 4 feet high x 4 feet wide x 4 feet long				
16.	The term that describes the decreasing s	ize	in a tree's diameter as one		
	travels up the stem.				
	a. taper		wane		
	b. sweep	a.	lean		
17.	The best time to regenerate a forest by hand or machine planting is:				
	a. late fall or winter		spring		
	b. late winter or early spring	d.	summer		

18.	A person took a total of 80 paces to trave What is the person's pace length? a. 5.0 feet		00-foot distance four times. 6.0 feet
	b. 5.5 feet		6.5 feet
19.	DBH refers to a height inches from the a. 42	_	ound: 54
	b. 48		60
20.	Pulpwood is the term used for wood prin		ly cut for what product? lumber
	b. veneer		paper products
21.	Creosote, Penta, CCA and copper naphth have been used in:	ena	ate are all chemicals which
	a. making paper		herbicides
	b. preserving wood	a.	insecticides
22.	Drupe, pome, achene, and samara all refe		
	a. tree floweringb. tree fruit		tree leaves tree orders
23.	Science dealing with the measurement of development of individual trees and stan the various products obtainable from the	ds,	and the determination of
	a. silviculture	C.	pathology
	b. ecology	a.	mensuration
24.	Mounds of soil used to divert run-off water		
	a. road terracesb. water bars		high boys diversion ditches
25.	The angular difference between magneti what?	c n	orth and true north is called
	a. bearing		declination
	b. azimuth	a.	none of the above
26.	What part of a timber sale contract depe boundaries?	nds	upon the property
	a. Preamble		Conditions of payment
	b. Description of sale area	a.	Designation of which trees to cut

27.	If you are traveling an azimuth of 135, you direction.	are	e headed in a
	a. Northwest	C.	Southeast
	b. Northeast		Southwest
28.	What is the form class of a tree 18 inches diameter inside bark at the top of the first a. 83 b083	t 16 c.	
29.	Which specie and bark type is incorrect? a. American Beech – Smooth b. Eastern White Pine – Scaly		Birch - Plated Black Oak –Furrowed
30.	An insect that belongs to the coleoptera animal matter.	ord	er, and feeds on plant and
	a. Gypsy Moth	c.	Southern Pine Beetle
	b. Pine Sawfly	d.	Cicadas
31.	Which of the following is NOT an angiosp	err	n?
	a. Oaks		Firs
	b. Elms	d.	Hickory
32.	leaflets are laterally attache Example: Hickory.	ed	along each side of the rachis.
	a. Palmately Compound	C.	Bipinnately Compound
	b. Pinnately Compound		Simple
33.	The standard scale for a 7.5 minute topo r	mai	p is
	a. 1:24,000	-	1:63,360
	b. 1:250,000	d.	none of the above
34.	The sum of the plot area sampled should total area of tracts under 300 acres.	rep	present percent of the
	a. 50		30
	b. 40	d.	20
35.	The sale of timber creates capital gains in a. True b. False	cor	me.
	D. 1 012		

36.	and are the main constitue a. carbohydrates / starches b. starches / cellulose	ents of wood. c. cellulose / carbohydrates d. lignin / cellulose			
37.	The type of fruit produced by a tree is det	ermined by the nature of the			
	a. leaf b. bark	c. ovary d. root system			
38.	What is the correct order? a. Class, Genus, Species, Order b. Order, Species, Genus, Class c. Family, Genus, Species, Kingdom d. Order, Family, Genus, Species				
39.	Which of the following is NOT a biologica	l factor affecting a tree's			
	environment? a. Pyric Activity b. Fungi	c. Small animal life d. Microorganisms			
40.	Broadleaf trees generally represent which of the following strata in a forest?				
	a. canopy b. herb layer	c. understory d. shrub layer			
41.	The population of plants that occupies ar succession of plant species is complete a stabilized is known as a:				
		c. climax community d. boreal forest			
42.	A permeable structure found in plant cel materials that can enter a cell is the:	s that restrict the kind of			
	a. nucleoplasm b. cell membrane	c. cell wall d. vacuole			
43.	A high-energy molecule that is formed d	uring the first light reaction of			
	photosynthesis is: a. NADPH b. ATP	c. cellulose d. chlorophyll			

- 44. Which of the following natural cycles is NOT an elemental cycle?
 - a. carbon cycle

c. water cycle

b. nitrogen cycle

d. oxygen cycle

- 45. A fruiting body is:
 - a. a structure that produces spores that develop into fungi
 - b. a fleshy structure that surrounds the seeds of a plant
 - c. a then strand of fungal tissue that enters tree roots, infecting them with disease organisms
 - d. a structure on a tree leaf in which sap become fermented to produce honeydew
- 46. Some kinds of plant release chemicals into the area close around them that provide small doses of poison to young plants that invade their territory. This defensive plant response is known as:

a. germicide

c. allelopathic effect

b. herbicide

- d. chemical warfare
- 47. A timber harvest operation in which entire trees are processed in the forest to produce biomass is called:

a. debarking

c. chaining

b. bucking

d. chipping

- 48. A firestorm is caused by:
 - a. ash that has drifted down from the atmosphere above the fire
 - b. a thunderstorm
 - c. erratic winds that move the fire into the forest canopy where there is plenty of fuel
 - d. lightning strikes
- 49. A pulping process in which wood fibers are separated by dissolving the lignin that cements them together is called:

a. hydra pulping

c. mechanical pulping

b. chemical pulping

- d. disk refining
- 50. A tensiometer is an instrument that is used to:
 - a. calculate the strength of a tree
 - b. measure the purity of irrigation water by testing the surface tension of water
 - c. estimate the flexibility of tree limbs
 - d. measure the water content of soil

2022 National FFA Forestry CDE Knowledge Exam B

- 1. Pick the correct definition of habitat structure?
 - a. Characteristics of the natural environment such as sunlight, temperature, moisture, and wind
 - b. Physical characteristics of the natural environment, such as how many
 - er

	trees there are, how tall they are, and what species they are c. The shrubs, young trees, and plants near the forest floor d. Animal or plant species that live in areas that have just had a large disturbance that removed much of the canopy, such as an extreme weather event like a windstorm or a clear-cut timber harvest
2.	What job title is being described? A(n) Samples water from a stream to make sure that it is safe. a. Volunteer b. Naturalist c. Ecologist d. Logger
3.	 What word matches this definition? The amount of sky obscured by the leaves and branches of the top layer of trees in the forest, measured as a percent. a. Clear cut b. Early successional c. Ground cover d. Canopy cover
4.	The trunk of a tree is considered which of the following? a. Internode b. Bole c. Crown d. Root
<u>5</u> .	 Which of the following is false about cambium cells? a. Cambium cells live between wood and bark cells and are visible only with a magnifying glass b. Cambium growth widens tree trunks, limbs, and roots c. Cambium cells divide forming wood cells toward the center of the tree and bark cells toward the outside d. Cambium cells carry food made in the leaves to the twigs, branches, trunk, and roots
5.	Which of the following is not an artificial reproductive method? a. Pruning b. Budding and Grafting c. Cuttings d. All of the above are artificial reproductive methods
7.	Oxygenic photosynthesis occurs in the located in the plant cell and absorbs blue and red wavelengths of lights.

- a. Mitochondrion
- b. Golgi Apparatus
- c. Nucleus
- d. Chloroplast

8.	living of within a. b. c.	parenchyma cells originate from the forming a network of cells around the tree. They transport sugars (food) to the parenchyma cells the growth ring, and they store starch. Heartwood Cambium Sapwood Seriate
9.	a. b. c.	sinus Margin Apex Midrib
10.	a. b. c.	species of wood can be used to produce ax handles? Sycamore White Birch Bald Cypress Hickory
11.	a. b. c.	of the following statements is not true about monocots? Monocot seeds have one cotyledon. Monocot flower parts come in multiples of 4 and 5. Monocot leaves have parallel venation. Monocots have scattered vascular bundles in the stem.
12.	a. b. c.	of the following is an accurate portrayal of the stages of succession? Annual weeds, perennials, shrubs, young trees Annual weeds, shrubs, perennials, young trees Annual weeds, young trees, shrubs, perennials Perennials, annual weeds, shrubs, young trees
13.	forest a. b. c.	is NOT a function of those plants growing next to the stream in a riparian buffer? Slow surface water runoff from farm fields converting concentrated flow to sheet flow. Reduce velocity of over-the-bank floodwaters. Shade the stream and moderate water temperatures. Storage and breakdown of NPS pollutants.
14.	the log	rule for scaling logs takes into account the amount of wood in the taper of from the small end to the large end? Scribner C. International Doyle d. None of them
15.	the inf a. b. c.	is an obligate parasite, and while trees usually do not die from estation, their growth is restricted. Slime Flux Rust Nematode Heart Rot

 16. A is formed through meiosis co original chromosome pair. a. Haploid cell b. Diploid cell c. Tetrad cell d. Mother cell 	nsisting of one chromatid from each
 17. Which of the following does not influent a. Amount of organic matter b. Drainage of the soil c. Minerals in the soil d. Amount of silt 	nce the color of soil?
 include damage caused to trees and other conditions, they are not control of trees in an area. a. Abiotic diseases b. Biotic diseases c. Fungus d. Parasites 	by conditions such as drought, heat, cold agious, but they may affect a large number
 19. When felling a tree with a chainsaw the a. is placed below the undercut b. should be placed on the same level c. should be level with the bottom d. should cut straight through the respective to the same level 	vel as the undercut of the open face notch
20. How many square feet are in 5.5 acres? a. 425,000 b. 243,560 c. 187,120 d. 239,580	
21. Mr. Fletcher plans to plant 50 acres of 1 intervals. How many seedlings per acre a. 96 b. 432 c. 454 d. 545	
22. If the male and female flower parts occ the species is said to be a. Dioecious b. Monoecious	
23. What is the form class of a tree 24 inches bark at the top of the first 16-foot log? a. 75 b075 c. 1.33 d. 133	es in dbh and 18 inches in diameter inside

24. Length of darkness influences plant growth. This is known as
a. Geotropism b. Thermotropism
c. Photoperiodism
d. Light Intensity
 25. For which of the following would an insecticide be used? a. Aphid b. Slime Flux c. Heart Rot
d. Nematode
26. In the rectangular survey system developed by Thomas Jefferson, run north to south. a. Principal Meridians b. Primary Meridians c. Secondary Meridians d. Guide Meridians
27. How many board feet are present in 20 boards 5/4 inches thick, 12 inches wide, and 144 inches long? a. 24 b. 300 c. 3600 d. 240
is a lengthwise separation of the wood, which usually extends across the rings of annual growth, commonly resulting from stresses set up in wood during seasoning. a. Cant b. Catface c. Check d. Conk
29. You tally 8 trees using a 10 factor wedge prism within a plot. What is the basal area in square feet per acre of the trees around that point?
a. 0.8 b. 8 c. 80 d. 10
a. 0.8 b. 8 c. 80

32. Assume that a cord of firewood costs \$150, how much would a stack of wood measuring 4' x 4' x 14' cost? a. \$75 b. \$150 c. \$263 d. \$450
 33. The best planting method for waterlogged soils is a. Pit planting b. Mound planting c. Berm planting d. Dibble planting
34. Opposite of succession is called: a. Secondary succession b. Tertiary succession c. Retention d. Retrogression
35. Which of the following is the correct way to write a legal description of a land Parcel: a. S 16, T4N, R2E, NE 1/4 of SE ½ b. R2E, S16, T4N, NW 1/4 of SW ½ c. NW 1/4 of SW 1/4, S16, T4N, R2E d. NE 1/4 of Se 1/4, R2E, T4N, S16
 36. A method of natural control of forest insect pests include(s): a. allowing predators of the insect to control them b. logging the infested tree c. spraying with insecticide after the trees are felled d. none of the above
37. The distinctive feature of topographic maps is the a. location of forest land b. location of landmarks c. location of roads and waterways d. shape or contour of the land
38. The use of a counter (back) fire is what type of forest fire control? a. Direct b. Indirect d. Triangulation
39. The decline in value of a fixed asset due to wear and tear from use is called: a. Declination b. Depletion c. Depreciation d. Diminishing returns
40.On a topographic map which of the following is a dark, heavy line with an elevation figure? a. contour index b. contour interval c. contour line d. horizontal control station

 41. An azimuth reading of 196 degrees would convert to a bearing of a. 96 degrees south b. 196 degrees SW c. S 16 degrees W d. 16 degrees SW
42. Merchantable height is that height from the stump to a. a specified minimum top diameter b. half-way between the first branch and the top of the tree c. that point which is 2/3 the total height of the tree d. the very top of the tree
 43. Light distribution can affect tree form, resulting in a. greater development of the tree on the side exposed to the most sunlight b. less growth on the side of the tree exposed to the most sunlight c. a tall, spindly tree because of exposure to the sun d. a short, overtopped tree because of exposure to the sun
44. Seed formation depends on the amount of reserve and nitrogenous materials in a tree. a. Fatty acids b. Carbohydrates c. Proteins and amino acids d. Oxygen
45. The term is used to describe the physical expression of an inherited tree trait that can be measured and observed. a. Genotype b. genetic map c. physical map d. phenotype
46. The damage done by the gypsy moth is when it is in the stage. a. Adult b. Pupae c. Egg d. Larva
47. Adult insects have 6 legs, adult mites have legs. a. 2 b. 4 c. 6 d. 8
48. Abnormal growth on trees that is caused by insects or mites is often called a. Galls b. Conks c. Whirls d. Scales

49. How r	nany acres are in an area 25 chains long by 20 chains wide?
a.	.5 acres
b.	5 acres
c.	50 acres
d.	500 acres
	are planted along city streets to help increase
a.	gas removal and particulate collection
b.	summer air temperatures
c.	temperatures of sidewalks and road surfaces
d.	wind velocity

NATIONAL FFA FORESTRY CAREER DEVELOPMENT EVENT

Exam

5. Which of the following is a survey line that runs east-west?

A. Principal Meridian

- B. Guide Meridian
- C. Section
- D. Baseline
- 6. Which of the following products does not come from cellulose xanthate?
 - A. Rosin
 - B. Photographic film
 - C. Cellophane
 - D. Rayon
- 7. The population of plants that occupies an environment when the succession of plant species is complete and the plant population has stabilized is known as a:
 - A. Boreal forest
 - B. Pioneer species
 - C. Climax community
 - D. Terminal forest
- 8. Which of the following is not one of the basic tissues systems of a plant?
 - A. Vascular tissue
 - B. Ground tissue
 - C. Dermal tissue
 - D. Nucleoplasm
- 9. Which tool is used to measure boundaries on scale maps to determine land area?
 - A. Dot Grid
 - **B.** Planimeter
 - C. Survey Instrument
 - D. Stereoscope

	Dehydration synthesis is a plant process that is responsible for the formation of:
	3. Starch
(C. Cellulose
[D. Chloroplast
11. \	What are current tree felling wedges made of?
A	A. Steel, plastic
E	3. Plastic, aluminum
(C. Wood, aluminum
[D. Steel, wood
	What method of forest regeneration relies on stump sprouts from harvested rees?
A	A. Stock Grafting Method
Е	3. Seed Tree Method
(C. Coppice Method
[D. Shelterwood Method
	Which of the following is an example of a commensalism relationship between organisms?
A	A. Mistletoe growing on a tree limb
E	3. Birds cache pine seeds for later use and a seed sprouts as a seedling
(C. Kudzu growing on a pine tree
ı). Spanish moss growing in the canopy of a tree
14. /	Annually, is the highest consumer of sawn wood.
-	A. China
E	3. United States of America
(C. German
[D. Italy

	A. Softwood has a rough wood texture
	B. Softwood is porous due to the presence of vessels
	C. Tracheid content in softwood is 90% to 95%
	D. Softwood comes from angiosperm, deciduous trees
16.	The strength of wood along the long axis of a tree is called:
	A. Ductile strength
	B. Density
	C. Toughness
	D. Tensile strength
17.	The intent of the was to establish forests on 40 acres of each 160-acre homestead in the Great Plains region.
	A. Homestead Act of 1862
	B. Timber Culture Act of 1873
	C. Twenty-Five Percent Fund Act of 1908
	D. Forest Reserve Act of 1891
18.	A tensiometer is an instrument that is used to:
	A. Measure the water content of soil
	B. Calculate the strength of a tree
	C. Measure the purity of irrigation water by testing the surface tension of water
	D. Estimate the flexibility of tree limbs
19.	The is a cell structure that contains materials capable of capturing energy from the sun as the plant produces sugars and starches.
	A. Protoplasm
	B. Cytoplasm
	C. Chloroplast
	D. Vacuole

15. Which statement is true?

A. Dehiscent B. Indehiscent
20.Fruit structures for elm, ash, and maple are known as Samara. Samara are

- C. Aggregate
- D. Multiple
- 21. Which weather condition would be of greatest concern when felling a tree?
 - A. Wind
 - B. Temperature
 - C. Humidity
 - D. None of the above
- 22. A saw that makes two or more cuts at the same time is called a:
 - A. Band Saw
 - B. Head Rig
 - C. Circular Saw
 - D. Gang Saw
- 23. Which of the following is NOT a basic assumption applied to partial cruises to ensure the accuracy of the results.
 - A. Teams of two cruisers work together, one taking measurements, one recording the data.
 - B. The sample must be representative of the entire forest.
 - C. Enough samples should be tallied to reduce the chance that errors will occur.
 - D. The plot size should be large enough to tally 15-20 trees per acre.
- 24. Trees that produce seeds inside an ovary or fruit are called:
 - A. Angiosperms
 - B. Gymnosperms
 - C. Monoecious
 - D. Dioecious

25. Which soil horizon, commonly referred to as topsoil, contains a mixture of humus and mineral soil?
A. O
B. A
C. E
D. B
26.Integrated Pest Management (IPM) utilizes which of the following control methods?
A. Chemical control
B. Mechanical control
C. Biological control
D. All of the above
 27. The first cut on each of the four sides of a log removes an exterior piece of wood called a A. Plank B. Cant C. Beam D. Slab
28 is the scientific care of shrubs and trees in cities and towns.
A. Silviculture
B. Arboriculture
C. Horticulture
D. Pomiculture
29. Which of the following is not a component related to Geographic Information Systems (GIS)?
A. Satellite
B. Computer
C. GPS Receiver
D. All of the above are related to GIS

- 30. Which of the following careers would most likely require individuals to have an advanced degree, such as a master or doctorate?
 - A. Urban Forester
 - B. Forest Technician
 - C. Land Surveyor
 - D. Research Scientist
- 31. As part of the 1933 "New Deal", the Civilian Conservation Corps (CCC) was created to plant trees, install erosion control structures, and build recreational campgrounds under the administration of what US President?
 - A. Herbert Hoover
 - B. Franklin D. Roosevelt
 - C. Theodore Roosevelt
 - D. Dwight D. Eisenhower
- 32. Which of the following is not considered an alternative enterprise for forest landowners.
 - A. Firewood
 - **B. Plywood and OSB**
 - C. Decorative or specialty wood products
 - D. Seed cone production
- 33. The _____ layer of the forest is made up of the tallest trees that rise above all others.
 - A. Emergent
 - B. Canopy
 - C. Understory
 - D. Forest Floor

34. Filter strips are areas of undisturbed vegetation that are left between site and a body of water. Which factor likely has the greatest effect of determining the width of the filter strip left in place following a logo operation?	on
A. Type of harvest operation performed	
B. Size of the body of water nearby	
C. Slope of the land adjacent to the body of water	
D. Species of trees present in the filter strip	
35. Hickory (Carya sp.) trees have compound leaves, where are laterally attached along each side of the rachis, or stalk.	e the leaflets
A. Palmately	
B. Alternately	
C. Bipinnately	

36.The western red cedar	(Thuja plicata) has a _	leaf shape

- A. Ovate
- B. Elliptical

D. Pinnately

- C. Lanceolate
- D. Scale-like
- 37. Achene fruit consists of a single, hairy seed that can be easily carried by wind. An example of a tree species with this fruit structure is:
 - A. Red Maple (Acer rubrum)
 - B. Sycamore (Platanus sp.)
 - C. Pecan (Carya illinoinensis)
 - D. Black Cherry (Prunus serotina)
- 38.All of the following instruments can be used to measure tree height except:
 - A. Biltmore/scale stick
 - B. Clinometer
 - C. Relaskop
 - D. Wheeler Caliper

39. V	Which of the following insect species is not considered a defoliator?
А	. Douglas fir tussock moth
В	6. Gypsy moth
С	. Cicada
D). Spruce budworm
40.	What is the correct order?
А	Class, Genus, Species, Order
В	. Order, Family, Genus, Species
С	. Order, Species, Genus, Class
D). Family, Genus, Species, Kingdom
41. If	you are traveling an azimuth of 215, you are headed in a direction.
А	. Northwest
В	. Northeast
С	. Southeast
D). Southwest
	he tree tissue responsible for transporting food made in the leaves to the roots called:
А	. Xylem
В	. Cambium
С	. Bark
D). Phloem
	block of wood 6 inches thick by 4 inches wide and 12 inches long contains oard feet of wood volume.
А	One
В	. Two
С	. Three
D). Four

44. Assume that a cord of firewood costs \$150, how much would a stack of wood measuring 4' x 4' x 24' cost?
A. \$75
B. \$150
C. \$300
D. \$450
45.The degree of acidity or alkalinity of a soil is expressed in pH values. Which of the following pH values is most alkaline?
A. 8.5
B. 7.0
C. 5.5
D. 4.0
46.What is the form class of a tree 18 inches in DBH and 14.4 inches in diameter inside bark at the top of the first 16-foot log?
A. 75
B075
C. 80
D80
47.How many square feet are in 3.5 acres?
A. 25,000
B. 152,460
C. 187,120
D. 108,900
48. The process of consuming carbohydrates and oxygen to obtain energy for the biological processes of life support, growth, and reproduction is called
A. Photosynthesis
B. Respiration
C. Transpiration
D. Oxidation

49	rule assumes 1-inch boards and $rac{1}{4}$ inch kerf, makes a liberal
	owance for slabs, and disregards taper.
	Scribner Rule
	International Rule
	Doyle-Scribner Rule
	Doyle Rule
50.	hen occurs the seed breaks dormancy and begins to sprout.
	Fertilization
	Pollination
	Germination
	Asexual Reproduction
